## KEY RESULT AREA

Senior Applied AI Engineer with **2000+** GitHub contributions. Architected multi-stage agentic AI runtimes (intent classification, goal decomposition, parallel tools) in TypeScript/Node.js and production data pipelines processing **1M+** content datapoints.

## TECHNICAL SKILLS

|           |                                                                                                                                    |
|-----------|------------------------------------------------------------------------------------------------------------------------------------|
| AI / LLM  | Agentic Workflows, Autonomous Agents, LLM API Integration, Groq API, Prompt Engineering, Intent Classification, Goal Decomposition |
| Languages | TypeScript, JavaScript, Node.js, Python                                                                                            |
| Backend   | Express.js, REST APIs, WebSockets, JWT Authentication, API Security, Webhook Handling, Rate Limiting, Proxy Handling               |
| Frontend  | React, Next.js, TailwindCSS, Framer Motion, Responsive Design                                                                      |
| Database  | MongoDB, Mongoose, SQL                                                                                                             |
| Systems   | System Design, Microservices, Performance Optimization, Core Web Vitals                                                            |

## PROFESSIONAL EXPERIENCE

Chief Technology Officer

Jan 2026 – Present

Mumbai, India

Foontro (foontro.com)

- Sole engineer owning 0-to-1 product development: architected, built, and deployed full-stack platform features, accelerating product shipping cycle by **60%**
- Engineered production WebSockets chat and secure payment webhooks, optimizing message delivery to under **100ms** latency with a **100%** success rate
- Implemented JWT authentication, RBAC authorization, and API rate-limiting across **100%** of user endpoints to enforce strict endpoint security

Full Stack Developer

Dec 2025 – June 2026

Kolkata, India

NXT World Wide (nxtworldwide.com)

- Architected AI marketing SaaS data pipelines ingesting **100K+** profiles and **1M+** content points with rate-limiting, proxy handling, and context retrieval optimization
- Designed scalable backend ingestion architecture supporting real-time data analytics and multi-tenant data processing
- Optimized database query indexing and aggregations in MongoDB/SQL, slashing query latency by **45%** on analytical API endpoints

Full Stack Developer

Feb 2024 – Dec 2025

Delhi, India

ZyrixCraft (zyrixcraft.com)

- Boosted mobile web Lighthouse performance from **72 to 94** and increased organic traffic by **15%** via Core Web Vitals tuning and structured data schemas
- Owned client-facing product feature lifecycle from early technical spec and prototyping to production deployment
- Refactored legacy frontend codebases into modular React component structures, cutting JavaScript bundle sizes by **25%**

## PROJECTS

Brahma: Agentic AI Runtime | TypeScript, Node.js, MongoDB, React, Socket.io

Jan 2026 – Present

- Multi-stage agentic AI runtime built in TypeScript/Node.js for multi-step AI app generation, implementing **5 cognitive stages** (Observer, Router, Planner, Executor, Composer) for task planning and tool execution
- Layered context memory architecture with persistent storage and a self-reflection engine that evaluates past agentic execution logs to optimize multi-step LLM reasoning
- Platform adapters for Discord, Email, and WebSockets; React telemetry dashboard for real-time inspection | [github.com/TheYuvrajMishra/Brahma](https://github.com/TheYuvrajMishra/Brahma)

LinkedIn Comment AI | JavaScript, Chrome Extension API, Groq API

Jun 2026

- Production LLM integration running directly in the browser via Chrome Extension API, featuring 5 prompt-engineered tone options, real-time post extraction, Draft.js DOM autofill bridge
- Client-side Groq API key storage with zero server dependency, prioritizing data privacy and low-latency LLM inference | [github.com/TheYuvrajMishra/linkedin-comments-ai](https://github.com/TheYuvrajMishra/linkedin-comments-ai)

LinkedIn Looker AI | Next.js, TailwindCSS, Puppeteer

Jul 2026

- AI post analysis platform scoring engagement patterns and structural hooks across creator posts; engineered headless Puppeteer scraper for automated data extraction | [linkedin-hooks-analyzer.vercel.app](https://linkedin-hooks-analyzer.vercel.app)

## EDUCATION

Bachelor of Computer Application (BCA)

Jul 2025 – Present

Kolkata, India

Indira Gandhi National Open University (IGNOU)

Higher Secondary: Commerce with IT Enabled Services

2025

Kolkata, India

Baidyapara High School (WBCHSE) CGPA: 9.5/10
